Subject Index

Acetylcholine, supraoptic and paraventricular nuclei, effect on 94
Acid phosphatase, hypophyseal activity, effect of TRF on 330
ACTH,
–, and MSH activities in hypophysis, effect of stress on 193
–, conditioned avoidance reflex, effect on 65
–, CRF, effect on 193
–, in hypophysis, effect of dexamethasone implants on 193
–, secretion, deafferentiation of medial-basal hypothalamus, effect on 43
–, –, hypothalamic monoamines, role in 247
–, –, ovariectomy and hypothalamic lesioning, effect on 263
–, –, regulation of 247
–, vasomotor reactions, effect on 65
Adrenocortical function,
–; following deafferentiation of medial-basal hypothalamus 43
–, regulation of 157, 232
–, stress response of 209
Age, FSH and FSH-RF concentrations, effect on 304
Aldosterone secretion, pineal gland, effect on 283
Atropine, plasma 17-OHCS levels, effect on 232

Behavior, ACTH, effect on 65
Blood pressure, ACTH, effect on 65
BOL-148, v. Serotonin, antagonists
Books, received, list of 126
–; reviews 64, 127, 192, 255
Brain, v. Hypothalamus
–; ablation, graded, effect on thyroid function 80
–; cerebral decortication, effect on thyroid function 80
–; cortical EEG, effect of progesterone on 275
–; development (transcallosal response), thyroid activity, effect on 147
–; limbic system, effect on hypophyseal-adrenocortical function 157
–; median eminence, dexamethasone implants in 193

Catecholamines, v. also Monoamines
–; as possible releasing-factors 40
–; histochemistry, in median eminence 35
Central nervous system, v. also Brain and Hypothalamus
–; electrolytes in, effect of estradiol and cortisol on 326
Chlordiazepoxide; effect on plasma 17-OHCS levels 232
Chlorpromazine; effect on plasma 17-OHCS levels 232
Circadian variations, plasma 17-OHCS levels, effect of CNS-acting drugs on 232
Conditioned avoidance reflex, ACTH, effect on 65
Corticoids,
–; effect on CRF 193
–; 17-OHCS in plasma, effect of CNS-acting drugs on 232
Corticosterone, in plasma, effect of stress on 209
Cortisol, electrolytes in CNS, effect on 326
CRF, in stalk-median eminence, effect of corticoids on 193
Cyproterone 107

Dexamethasone implants,
–; in hypophysis and median eminence 193
–; MSH activity in hypophysis, effect on 201
Didelphis Virginiana, v. Opossum
Diphenylhydantoin, plasma 17-OHCS effect on 232
Drake, thyroid function, regulation of 113

EEG, cortical, effect of progesterone on 275
Electrical activity, in supraoptic and paraventricular nuclei 93
Electrolytes, in central nervous system, effect of estradiol and cortisol on 236
Emotional response, v. Behavior
Estradiol, electrolytes in CNS, effect on 326
Estrogen, ACTH and TSH secretions, effect on 263
Estrous cycle, light deprivation, effect on 1

Follicle-stimulating-hormone releasing-factor, v. FSH-RF

Subject Index

Acetylcholine, supraoptic and paraventricular nuclei, effect on 94
Acid phosphatase, hypophyseal activity, effect of TRF on 330
ACTH,
–, and MSH activities in hypophysis, effect of stress on 193
–, conditioned avoidance reflex, effect on 65
–, CRF, effect on 193
–, in hypophysis, effect of dexamethasone implants on 193
–, secretion, deafferentiation of medial-basal hypothalamus, effect on 43
–, –, hypothalamic monoamines, role in 247
–, –, ovariectomy and hypothalamic lesioning, effect on 263
–, –, regulation of 247
–, vasomotor reactions, effect on 65
Adrenocortical function,
–; following deafferentiation of medial-basal hypothalamus 43
–, regulation of 157, 232
–, stress response of 209
Age, FSH and FSH-RF concentrations, effect on 304
Aldosterone secretion, pineal gland, effect on 283
Atropine, plasma 17-OHCS levels, effect on 232

Behavior, ACTH, effect on 65
Blood pressure, ACTH, effect on 65
BOL-148, v. Serotonin, antagonists
Books, received, list of 126
–; reviews 64, 127, 192, 255
Brain, v. Hypothalamus
–; ablation, graded, effect on thyroid function 80
–; cerebral decortication, effect on thyroid function 80
–; cortical EEG, effect of progesterone on 275
–; development (transcallosal response), thyroid activity, effect on 147
–; limbic system, effect on hypophyseal-adrenocortical function 157
–; median eminence, dexamethasone implants in 193

Catecholamines, v. also Monoamines
–; as possible releasing-factors 40
–; histochemistry, in median eminence 35
Central nervous system, v. also Brain and Hypothalamus
–; electrolytes in, effect of estradiol and cortisol on 326
Chlordiazepoxide; effect on plasma 17-OHCS levels 232
Chlorpromazine; effect on plasma 17-OHCS levels 232
Circadian variations, plasma 17-OHCS levels, effect of CNS-acting drugs on 232
Conditioned avoidance reflex, ACTH, effect on 65
Corticoids,
–; effect on CRF 193
–; 17-OHCS in plasma, effect of CNS-acting drugs on 232
Corticosterone, in plasma, effect of stress on 209
Cortisol, electrolytes in CNS, effect on 326
CRF, in stalk-median eminence, effect of corticoids on 193
Cyproterone 107

Dexamethasone implants,
–; in hypophysis and median eminence 193
–; MSH activity in hypophysis, effect on 201
Didelphis Virginiana, v. Opossum
Diphenylhydantoin, plasma 17-OHCS effect on 232
Drake, thyroid function, regulation of 113

EEG, cortical, effect of progesterone on 275
Electrical activity, in supraoptic and paraventricular nuclei 93
Electrolytes, in central nervous system, effect of estradiol and cortisol on 236
Emotional response, v. Behavior
Estradiol, electrolytes in CNS, effect on 326
Estrogen, ACTH and TSH secretions, effect on 263
Estrous cycle, light deprivation, effect on 1

Follicle-stimulating-hormone releasing-factor, v. FSH-RF

FSH, v. also Gonadotropins
–, hypophyseal and serum concentrations of, effect of cyproterone on 107
–, hypophyseal concentration of, effect of age on 304
–, hypothalamic metabolism, effect on 213
FSH-RF,
–, chromatographic behavior of 294
–, hypothalamic concentration of, effect of age on 304

Glycolytic metabolism; in hypothalamus 213
Gonadotropins, v. also FSH
–, secretion by hypophyseal transplants, effect of light on 129
Goiter formation; in fetal and neonate rats 19
Goitrogens, 20, v. also Propylthiouracil

17-Hydroxycorticoids (17-OHCS), circadian variations in plasma, effect of CNS-acting drugs on 232
5-Hydroxyindoleacetic acid, oxytocin release, effect on 222
5-Hydroxytryptamine, v. Serotonin
5-Hydroxytryptophan, oxytocin release, effect on 222
Hypophyseal-adrenocortical function,
–; following deafferentiation of medial-basal hypothalamus 43
–, ovariectomy and hypothalamic lesioning, effect on 263
–, regulation of 157, 193, 232
Hypophyseal-thyroid function,
–; hypothalamic regulation of, review 175
–; in fetal and neonate rats 19
–, ovariectomy and hypothalamic lesioning, effect on 263
Hypophysis,
–, acid phosphatase activity in, effect of TRF on 330
–, dexamethasone implants, in 193
–, pars intermedia, hypothalamic regulation of 11
–, transplantation of, effect of light on gonadotropin secretion by 129
–, effect on thyroid function 76
Hypothalamic-hypophyseal-adrenocortical function, regulation of 193, 232
Hypothalamic-hypophyseal-thyroid axis
–; function of, in fetal and neonate rats 19
–; in drake 113

Hypothalamus,
–; anterior, in opossum 88
–, dexamethasone implants, in 193
–, granulated vesicles, in, EM'99
–, lesioning of, effect on ACTH and TSH secretions 263
– –; effect on hypophyseal-adrenocortical function 157
– –; effect on thyroid function 20
–; medial-basal, deafferentiation of, effect on ACTH secretion 43
–, metabolism of (glycolytic and oxidative) 213
–; monoamines in, role in ACTH secretion 247
–; regulation of pars intermedia by, in toad 11
–, reserpine implants, in 247
–, -stalk-median eminence area, TSH concentration, in 315
–, supraoptic and paraventricular nuclei, electrical activity of 93

Intermedin 11
Iproniazid, oxytocin release, effect on 222

LH, metabolism of hypothalamus, effect on 213
Light deprivation; effect on estrous cycle 1
–; effect on organ weights 5
–, gonadotropin secretion by hypophyseal transplants, effect on 129
–, MSH activity in hypophyses, effect on 257

Meprobamate, plasma 17-OHCS levels, effect on 232
Metabolism; glycolytic and oxidative, in hypothalamus 213
Methimazole 20
α-Methyl-dopa, oxytocin release, effect on 222
Milk ejection, regulation of 222
Monoamines, v. also Catecholamines and Serotonin
–, in median eminence 99
–; in hypothalamus, effect of reserpine on 247
–; role in ACTH secretion 247

MSH activity in hypophysis, effect of light on 257
–, effects of stress on 200
–, secretion, regulation of 11
–; release inhibiting factor 200

Neurosecretion,
–; in hypothalamus of opossum 88
–; in "medial prechiasmatic gland" 56
–, in median eminence, effect of reserpine on 99
Neurosecretory fibers, structure and histochemistry of 30

Opossum, anterior hypothalamus of 88
Organ weight, rat, effect of light-deprivation on 5
Ovarian function,
–; effect on hypophyseal secretion, mechanism of action 263
–; hypophyseal transplants and light, effect on 129
Oxidative metabolism; in hypothalamus 213
Oxytocin, reflex release of, role of serotonin in 222

Pineal gland,
–, aldosterone secretion, effect on 283
–, male reproductive organs, effect on 138
–, MSH activity in hypophysis, effect on 257
Pituitary, v. Hypophysis
Prechiasmatic gland, medial, ultrastructure of 56
Progesterone, cortical EEG, effect on 275
Propylthiouracil 19, 78, 315

Reproductive organs, male,
–, cyproterone, effect on 109
–, pineal gland, effect on 138
Reserpine,
–, granulated vesicles in median eminence, effect on 99
–, hypothalamic monoamines, effect on 247
–; implantation of, in hypothalamus 247
–, plasma 17-OHCS levels, effect on 232
–, tuberohypophyseal tract, effect on 30

Serotonin, v. also Monoamines
–; antagonists, effect on oxytocin release 222
–, reflex release of oxytocin, role in 222
Sodium deficiency, aldosterone secretion, effect on 283
Sodium phenobarbital, plasma 17-OHCS levels, effect on 232
Stress,
–; environmental, effect on adrenocortical function 209
–, MSH activity in hypophysis, effect on 200
–; response to, following hypothalamic lesioning 49
–, –, regulation of 157, 209
Subcommissural organ 56
Supraoptic (prechiasmatic) recess, ultrastructure of 56

Tapazole, v. Methimazole
Testosterone,
–; antagonist, cyproterone 107
–, hypothalamic metabolism, effect on 213
Thyroid,
–, activity, effect on transcallosal reponse 147
–, function, brain ablation, graded, effect on 80
–, –; hypophyseal transplants, effect on 76
–, –; hypothalamic regulation of, review 175
–, –; in fetal and neonate rats 19
–, –; maternal-fetal interrelationships 19
–, –; regulation of, in drake 113
–; goiter formation, in fetal and neonate rats 19
Thyrotropin-releasing factor, v. TRF
Transcallosal response, effect of thyroid activity on 147
TRF,
–; effect on TSH secretion and on acid phosphatase activity 330
–; review 175
Tryptophan, oxytocin release, effect on 222
TSH,
–; concentration of, in hypothalamic area 315
–, secretion, effect of TRF on 330
–, –; maternal-fetal interrelationships 19
–, –; ovariectomy and hypothalamic lesioning, effect on 263
–, –; regulation of 76
Tuberohypophyseal tract 30

UML-491, v. Serotonin, antagonists
Uterus, hypophyseal transplants and light, effect on 129

Vasomotor reactions, ACTH, effect on 65

Neuroendocrinology

International Journal for Basic and Clinical Studies
on Neuroendocrine Relationships
